Consultations

Cosmetic Consult

An introductory appointment with Dr. Concannon to assess and go over different options based on area of concern. All cosmetic consultations are complimentary.

Skin Consult

The complimentary consultation and skin evaluation performed by a team member with our Emage skin analysis to address your specific skin care questions or concerns. Our professional staff will customize a personal skin care regimen just for you.

Facials

Dermaplaning

An exfoliation treatment that gently resurfaces the top layer of the skin. Good choice for anyone with fine facial hair, sensitive skin, or rosacea.

Concannon Signature Customized Facials

Facials to meet your specific skin type to treat acne, anti-aging, hydration or a combination of all, this is for you!

HydracialMD

This rejuvenating treatment is excellent for treating all skin types by a process of cleansing, exfoliating, acid peel, extractions and hydration. With or without dermaplane.

Concannon Medical Microdermabrasion

Excellent for softening fine lines and wrinkles, and for improving uneven skin tones or enlarged pore size. Includes cleansing, dermaplaning, microderm treatment, chemical peel, mask and SPF.

Extractions

An aggressive cleanse with specialty serums and treatment techniques loosen up blackheads and sebum for easier removal. Some patients may experience temporary discomfort and minor redness of the area following the treatment.

Concannon Back Facial

A clinical facial done specifically on your back.

Peels

Customized Chemical Peel

Our highly skilled medical aestheticians will choose from an exclusive array of specialty peels based on your skin type and desired results.

CPRX Peel

A deep rejuvenating TCA peel for deep exfoliation and correction of fine lines, wrinkles, sun damage, and acne scars.

Microlaser Peel

Skin resurfacing at different layers of the skin. Correction of fine lines and wrinkles, sun damage and acne scars.

Nano Peel

Uses light energy to instantly remove the top layers of the skin at a depth that also accelerates the skin's own renewal process by activating special messenger proteins to create beautifully smooth, luminous skin.

Non-Invasive Fat Reduction & Skin Tightening

Vanquish Fat Reduction & Body Contouring

Utilizes radiofrequency energy technology that focuses into the desired fat layers, while protecting the other surrounding tissues.

Exilis Skin Tightening & Body Contouring

A non-invasive aesthetic device for the treatment of skin tightening and fat reduction. Using safe thermal energy, patients experience a comfortable deep heating sensation with each short treatment session.

SkinTyte

A non-invasive light therapy that tightens loose skin with no downtime. SkinTyte utilizes a broad spectrum of light that delivers energy into the dermal layer of your skin allowing our body's natural response to create more collagen.

Excessive Underarm Sweating miraDry

A quick non-invasive procedure performed by one of our nurses and is the only non-invasive technology that is FDA cleared and clinically proven to eliminate sweat and odor. You can expect to see sweat reduction immediately after treatment, with minimal downtime.

Laser Treatments

Laser Hair Reduction

Permanently reduces unwanted hair from legs, back, face, bikini and other areas.

Photo Rejuvenation (IPL/BBL)

Our photo rejuvenation procedure corrects photo-aging, sun damage, broken capillaries, rosacea and more.

Isolaz Acne Treatment

A unique, safe and effective acne light procedure that purifies your pores deep down to attack acne causing bacteria at the source.

Clear + Brilliant

Recommended for patients who want smoother looking skin, improved tone and texture. Natural glow with minimal downtime.

Forever Young Broadband Light (FYBBL)

An innovative treatment that treats the signs of aging now and stops the clock on facial aging. The treatment uses photothermal energy to eliminate physical signs of aging including red and brown discoloration in the skin while changing the expression of DNA at the cellular level, making the skin cells act decades younger. This process helps restore the skin to its natural, youthful state without any harsh chemicals or downtime

Profractional Laser

Profractional therapy goes deep into the dermis to stimulate new collagen growth, dramatically improving the skin's tone, texture, fine lines and wrinkles and the appearance of scars. Depending on the depth of the treatment may require a few days of social downtime. Full results can be seen in 6 months.

spahhhh....
